Business Overview

Business Overview

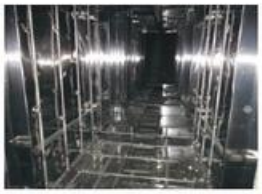

Trinity Industrial is active in two business fields: the equipment business and the parts business.

Paint and Application Systems Division

We offer integrated service that spans planning, design, manufacturing, installation, and after-sales service for customers' paint plants.

Paint plant

From entrance to exit, we propose painting processes with cutting-edge environmental technologies.

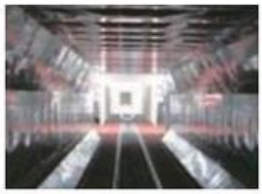

Pre-treatment system

Electrodeposition coat system

Painting booth/Air make up system

Oven

Painting systems

Paint supply system

Our machines enable control of the paint discharge amount to adjust the painting film thickness, changing colors using the paint/cleaning valves, and painting in varied colors.

Painting robot systems

This system stabilizes painting quality and improves productivity.

Paint Applicators

We offer a lineup of paint applicators suited to different applications.
